years of passion for fresh pasta.

Our story starts in 1937 with the first tortellini we made. We haven't looked back since.

**We've been making a traditional symbol of Made in Italy for four generations.** There's nothing we don't know about fresh pasta. That's why we make it, for you.

**We supply the big names in retail, both in Italy and abroad.** Quality is our badge of pride. Our fresh pasta from Venice graces the tables of people all over the world, making you feel at home, wherever you are.

**VOLTAN FRESH PASTA: MADE BY OUR FAMILY,  
SINCE WE STARTED.**

**A FLAVOUR-FILLED STORY.**

A STORY ABOUT  
INTUITION,  
INNOVATION,  
GROWTH.

EST. 1937

#### INTUITION:

In 1937 Leandro Voltan had a vision of a business that didn't even exist yet. He was going to put his fresh pasta on the table of all and sundry. So he turned a little food store near Venice into his first fresh pasta business. **He specialized in making tortellini.**

#### INNOVATION:

Incorporating **pasteurization into the production process** meant the dream of pasta staying fresh longer but retaining all of its qualities became reality. Leandro got a patent for it and registered it in Switzerland. He went from an artisan pasta maker to being the first entrepreneur in the fresh pasta industry, which was still waiting to be developed. This was 1959.

#### GROWTH:

To meet steadily increasing demand, the first Voltan factory for industrial pasta production was built in Olmo di Martellago (Venice). It was now 1969 and this was the first step. We then doubled the offices, warehouses, manufacturing capacity and production lines. The number of factories grew to four, situated in Veneto and Lombardy. The logistics and distribution structure was optimized. The number of products and new recipes multiplied.

**THEN OUR  
FRESH PASTA  
WENT GLOBAL.**

Globalization, food tourism, the cinema that so often made it a co-star are just some of the many reasons why pasta has become an Italian icon and a global food.

From the Nineties onwards, Voltan cashed in on that opportunity, bringing fresh tortellini and pasta from Venice to tables all over the world.

Today, our past inspires our future. We're getting a fresh new image and fresh new products, while staying true to our tradition and our region, safe in the hands of the same family, for four generations.

VOLTAN

**WE ARE VENETIANS. TRADE IS IN OUR DNA. WHAT ELSE COULD WE DO BUT PUT OUR FRESH PASTA ON TABLES ALL OVER THE WORLD?**

This is how we share our local tradition on a global scale. We represent Made in Italy value that embraces the tastes and demands of consumers. Making fresh pasta is what we have always done. **We build on our expertise, supported by high tech machines and processes to optimize production and meet new market trends and demands at unrivalled speed.**

**“QUALITY IS ALWAYS DOING  
THE RIGHT THING, EVEN WHEN  
NO ONE IS LOOKING.”**

Henry Ford

Quality has only ever been an unquestionable aim, not an optional, for Voltan. Not just for ingredients either. In 1995 we embarked on a mission that focussed on a **research centre and an accredited internal testing laboratory measuring over 200 sq.m**, which led to us achieving some of the most important national and international accreditation and certifications.

Our dedicated Quality Team, working round the clock, helps us adopt strict safety measures and **every year we perform more than 60,000 lab tests** on raw materials, semi-finished and finished products.

We only use verified, approved suppliers.

**FOR US, EXCELLENCE MEANS ABSOLUTE  
FOCUS ON WHAT WE DO. AS IF EVERY INDIVIDUAL  
ACTION IS THE ONLY ONE THAT COUNTS.**

**“SUSTAINABILITY IS THE ABILITY  
TO MEET OUR OWN NEEDS WITHOUT  
COMPROMISING THOSE OF  
FUTURE GENERATIONS.”**

Albert Einstein

**SUSTAINABILITY IS NOT JUST ABOUT WHAT WE EAT. IT'S ALSO HOW WE PRODUCE IT AND DISTRIBUTE IT.**

We can tell you that we have only ever used quality ingredients, produced in a way that respects nature and the environment.

That we use highly recyclable packaging solutions and **we have reduced packaging weight by 40% over the last 10 years, we reuse production waste to make biogas**, we are working to minimize waste, **we only use renewable energy from our own photovoltaic system.**

That our high tech systems optimize production so we can manage our resources correctly, drastically reducing CO<sub>2</sub> emissions.

It's all true.

But that is no longer enough. We are working to make our product lines carbon neutral **with integral CO<sub>2</sub> emission offsetting** in the entire life cycle of our products.

We have set our sights on becoming **carbon neutral**. It's an ambitious goal and we know it. This is where we are heading. There's a long road ahead of us, but we are determined to run the whole course.
